Executive Summary

The following document is the Deliverable 9.5 First year dissemination and exploitation report of the DIAMOND Project, funded by the European Union's Horizon 2020 research and innovation programme under grant agreement Number 824326.

The main aim of DIAMOND Project is to turn data into actionable knowledge with notions of fairness, in order to progress towards an inclusive and efficient transport system, by the development of a methodology based on the collection and analysis of disaggregated data, including new sources, analytics and management techniques.

The aim of this document is to provide a dissemination and exploitation strategy plan for the DIAMOND project.

This document is divided on two parts: the dissemination part report that provide a list of actions that have been carried out during the first year of the project to ensure exposure and diffusion of the project. The exploitation plan defines how the results of the project will be utilized, not only during the project duration but after it concludes. This plan is based on a thorough identification of the project results.

NOTE: Front page and Executive summary will be published in the website for all deliverables
