

Hello and thank you for registering to take part in our webinar co hosted by the **DIAMOND** consortium and **Women in Rail (Scotland)**. The webinar has been planned as an interactive event where we will share our research findings and self-diagnosis tool designed using the research findings.

In the discussion part of the webinar we will be explaining the rationale behind the maturity table, and how we envisage it will increase fairness and inclusivity within and across transport organisations.

With this in mind we have attached here a copy of the maturity table that you will be asked to provide feedback on for your perusal prior to the event in order that you can provide more focused and robust feedback.

Thank you for your assistance.

Q1. Please tell us your opinion on the maturity model approach and how effective you believe it can be for an organisation like a transport service provider?

Q2. Please tell us your opinion on the contents of the maturity table, do you believe we have included all of the relevant concepts?

Q3. Do you have any further suggestions to add to the maturity model approach?
